Message from the head of IT on introduction of technological advancement.

At Pizzaman Chickenman, we are excited to share the recent technological advancements we have implemented to enhance your dining experience. Our commitment to innovation has led us to introduce several new features that streamline our services and improve customer satisfaction.

We launched the **Chris B App**, a user-friendly app that allows you to place your orders conveniently from your mobile device. Not only can you track your order in real-time—from acceptance to preparation and finally, to readiness—but you can also enjoy secure payment methods, ensuring your transactions are safe and reliable.

Self-service systems were also introduced at our branches. These allow you to place orders directly to the chefs in the kitchen, making the process even more efficient and personalized.

In addition, we've installed screens at our restaurants that provide real-time order tracking. This way, you can stay informed about your order status while enjoying the vibrant atmosphere of our dining spaces.

We are excited about these advancements and how they will enhance your experience at Pizzaman Chickenman. Your feedback is invaluable as we continue to innovate and grow. Thank you for being part of our journey!

Lunch Time Team Surprises Medeama Sporting Club!

Guess what? Our Lunch Time team decided to shake things up a bit by surprising the amazing athletes at Medeama Sporting Club! And let me tell you, it was an event to remember!
